

# LEVERAGE THE POWER OF **SERVICE VIRTUALISATION**

to reduce costs, speed up release cycles, improve quality and remove the issues associated with test environments.

01

## **REMOVE BOTTLENECKS FROM TEST ENVIRONMENTS**

Avoid downtime due to unreliable or unavailable test environments, maximising efficiency and minimising costs.

02

## **REDUCE 3RD PARTY PLATFORM RELIANCE**

Remove conflict, contention and costs stemming from reliance on integrated third party platforms.

03

## **SHIFT LEFT / START TESTING SOONER**

Streamline your Agile or DevOps projects, starting testing sooner and delivering quality results faster.

04

## **GAIN FULL CONTROL OF YOUR TEST DATA**

Effectively generate specific test data, siloing and managing it to avoid conflict between data groups.

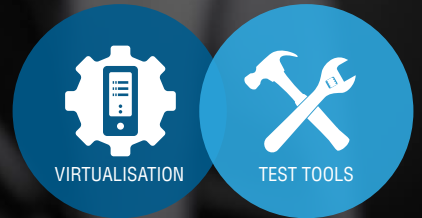

FLAT FEE

**\$5,000**  
PROOF OF CONCEPT

Talk to Planit today about how Service Virtualisation can benefit your projects and take advantage of our \$5k flat fee Proof of Concept offer including ROI and Business Value Analysis.

# SERVICE VIRTUALISATION

Are your test environments extending your release times and lengthening your time to market?

In today's complex system environments, Service Virtualisation is an invaluable tool for reducing risks in development. Through environment simulation, it replaces costly or constrained systems while facilitating improved quality and increased speed of delivery.

Avoid the hassle associated with systems that are unavailable, under construction or expensive to access and start testing sooner.

## ON PREMISES

Service Virtualisation on premises puts you in control with term or perpetual licensing options available. Define your own hardware, either self-managing your services or outsourcing to Planit.

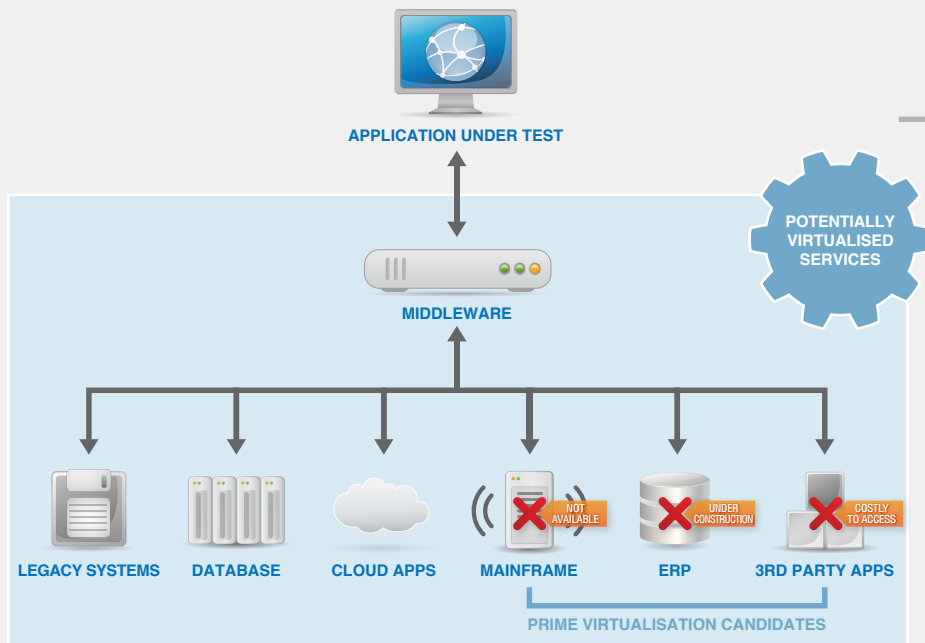

## IN THE CLOUD

Take advantage of Planit's world-first cloud-based Service Virtualisation solution that provides maximum speed, flexibility and affordability. Only pay for what you use. Benefit from minimal startup times. Upgrade your license and hardware with ease.
